SINKS

Images of sinks do not show the mixer tap hole. The exact position is detailed in the technical diagram to the side of the picture.
The lettering RHD indicates draining board on the right, while LHD indicates draining board on the left.

PREFIXED SEALING Optimal aesthetic results and simple installation.

POP-UP WASTE Pull remote control for opening and closing drain. Make sure there is a second hole.

ROTATING WASTE Rotating remote control for opening and closing drain.
Make sure there is a second hole.

OVERFLOW OUTSIDE BOWL Enables optimal use of the sink, allowing it to be filled to the brim.

COMPLETE WITH ACCESSORIES Product supplied with accessories included. The blue numbers indicate the elements supplied (see list).

Optional

POP-UP WASTE Pull remote control for opening and closing drain. Make sure there is a second hole.

Optional

ROTATING WASTE Rotating remote control for opening and closing drain.
Make sure there is a second hole.

Optional

SOAP DISPENSER Liquid soap or detergent always to hand. Make sure there is a second hole.

Optional

DISPOSER Facilitates disposal of damp waste (installation permitted in line with local provisions).

STANDARD EDGE

SLIM EDGE

SLIMTOP EDGE

FLAT EDGE

FLUSMOUNT

UNDERMOUNT

HOBS

DUAL TRIPLE CROWN Thanks to two concentric crowns, various flame settings can be chosen to suit the cooking requirements.

DOUBLE CROWN The flame distributed over the two crowns offers quick and even cooking.

CAST IRON GRIDS Solid and non-deformable, the cast iron grids provide a stable cooking surface and sturdy construction coupled with an elegant, professional look.

INCORPORATED ELECTRONIC IGNITION Ignition device incorporated into the knob. Ignites the gas without the need for additional flames.

SAFETY VALVE An essential device which shuts off the gas supply to the burner in the event of the flame going out accidentally.

RECESSED HOB The perimeter and burners of the hob are recessed into the kitchen worktop in order to provide a virtually flush line.

Optional

CAST IRON GRIDS Solid and non-deformable, the cast iron grids provide a stable cooking surface and sturdy construction coupled with an elegant, professional look.

Optional

KNOBS Available with various finishes, hob knobs can be chosen to match those of ovens for perfect design continuity.

OVENS

COOL TOUCH DOOR The door comprises an articulated, load-bearing structure housing 2, 3 or 4 sheets of glass, depending on the model. The door always remains cold, even in the most critical situations.

MULTIFUNCTION The Franke range of ovens features models with 5, 6, 7, 8, 9, and 12 functions for optimal cooking management.

TANGENTIAL VENTILATION All Franke ovens are equipped with tangential cooling ventilation: a powerful fan creates forced air movement to keep the oven door and sides cool.

NATURAL STATIC COOKING This function is ideal for all traditional dishes, for baking bread and cakes and for cooking roasts and lamb.

TOP COOKING This function can be used to reheat dishes; it is also ideal for cooking and browning.

BOTTOM COOKING This function is for cooking with heat from below. The intense heat is ideal for roasting meat which is not particularly tender.

COOKING WITH GRILL This function uses the top grill only and is ideal for toasting bread and for browning meat or fish.

TURBO GRILL The heat is generated by the grill and distributed by the rear fan. Ideal for cooking thick cuts of meat and poultry.

ASSISTED COOKING Offers rapid, uniform cooking results making it ideal for flans, meat & veg pies, puddings and roasts. Also useful for cooking on two shelves without any transfer of aromas or flavours.

TOP FAN-ASSISTED COOKING This function is particularly useful for preparing dishes like lasagne, meat & veg pies and pasta and vegetable flans.

BOTTOM FAN-ASSISTED This function activates the bottom heating element and the fan. Ideal for cooking fish and frozen and precooked products in general. Its use with pattiserie products is very effective.

"MULTI POWER" COOKING Offers the same advantages of fan-assisted cooking with the addition of optimal temperature distribution throughout the oven. Ideal for the preparation of foods that must be cooked through to the core with a crispy outer surface.

FAN-ASSISTED COOKING The hot air circulating uniformly inside the oven reduces preheating and cooking time and is ideal for cooking all types of dishes, simultaneously if desired, on up to 3 shelves.

SOFT COOKING The low power and the fan allow very gentle and even cooking. Ideal for dry pastry and all types of prolonged low-temperature cooking.

QUICK COOKING The most powerful function. It can be used universally to quickly reach the set temperature and then continue with desired cooking function.

PIZZA This cooking mode prioritises heat emission at the bottom of the oven, without omitting top cooking, imitating the heat distribution of a wood-fired oven.

DEFROST/DOUGH RESTING/QUICK DEFROST/PLATE WARMER For ovens where this function is not identified by a specific position of the selector, simply select a "hot air" cooking function and set the temperature selector to "0".

WATER CLEAN This feature is ideal for cleaning the oven with stubborn stains.

SMALL GRILL Ideal for gentle browning.

BOTTOM COOKING
(for gas ovens)

ROTISSERIE (for gas ovens)
Ideal function for roasted goods (chicken, kebabs).

GRILL WITH ROTISSERIE Instantly browns the surface of the food while keeping the inside moist.

COMPLETE MENU The exclusive Franke programme which enables automatic cooking of 4 different dishes all together in under one hour.

GUIDED COMPLETE MENU The exclusive Franke programme which guides you step-by-step through the preparation of a full menu, cooking 3 different dishes all together in under one hour.

WELLNESS PROGRAMME Automatic, step-by-step recipes for cooking dishes in a completely natural way, without oil or any other added ingredients.

GUIDED WELLNESS PROGRAMME Guided, step-by-step recipes for cooking dishes in a completely natural way, without oil or any other added ingredients.

RECIPE LIST The electronic programmer automatically manages over 50 recipes.

GUIDED RECIPES Favourite Italian dishes prepared to perfection, guided step-by-step by the electronic programmer.

HEAT PROBE A great help in the kitchen. Connected to the oven's heating elements, it switches them off when the pre-set temperature is reached.

PIZZA MENU The special programme for cooking up to four pizzas perfectly at once, and enjoying them fresh from the oven in the company of friends or family.

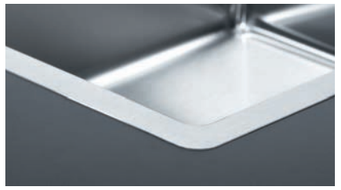
Tight radius
You can choose from the many radius options for an effect that enhances the elegance of the product, increasing its functionality in terms of use and cleaning.

Radius 0 > Planar
Radius 10 > Maris
Radius 12 > Box Center
Radius 16 > Maris Slimtop Bowls

Hidden overflow
The hidden overflow replaces traditional slits, providing better look to the bowl.

Fast Fix system
Maris Slimtop Bowls Range
All New Maris Slimtop Bowls are equipped with the innovative and exclusive patented Fast Fix mounting system This system allows to install the bowls in a rapid and simple way, and completely ergonomically. Once it has been positioned the silicone is enough to position the bowl and press slight downward making sure that the device engages to the top of the kitchen.



Slimtop inset
The new inset method of installing bowls and sinks in solid and laminate surfaces. Extremely easy installation and an elegant appearance are its defining features.

Flushmount
The method for fitting bowls and sinks into resin and artificial stone worktops and creating endless surfaces.

Drain with remote control
A command that offers many advantages: it allows the emptying of the bowl while keeping your hands clean and dry. Its use becomes ideal especially in cases of sink full of very hot water or food residues.

Premium basket
The basket can be easily removed from the waste hole thanks to a larger grip.

Multifunctional space
Box Center
The increasingly dynamic sink with multifunctional space designed to change every day and become part of your environment.
The most important kitchen accessories are integrated in the sink and neatly stored in the compartment bowl - accessible all the time.
The new Box Center is further enhanced by slimtop edges, patented Fast Fix mounting system and innovative bowls with 12 mm radius corners.

Box Center Slimtop Flushmount

The new Box Center is equipped with integrated waste kit, stainless steel waste hole cover, Fast Fix system and R12 radius.

053 — 054 Inset Bowls
055 — 056 Acquario Line

Inset Sinks

A world leader in production of sinks, Franke offers a unique range of products. Comprising models are the very pinnacle of functionality and design, complete with various accessories that merge practicality and efficiency.

Thanks to years of research and experimentation on steel, Franke could vouch for the excellent quality of its raw materials and finished products, both in terms of functionality and appearance; Practicality of use and total safety; Water and energy savings, and respect for the environment.

Cross-cutting range
In order to be able to fit perfectly into any type of kitchen, Franke has a cross-cutting range of sinks for conventional flush-mounting, spanning from the most basic models to veritable design elements with the power to upgrade the style and functionality of their surroundings.

Sophisticated details
The slim edges, the professional taps and fittings and the elegant contours of the strainers make Franke sinks truly unique.

Choosing the edge
Depending on the context, the aesthetic and functional requirements, Franke offers the possibility to choose between a Standard edge and a Slim edge.

Standard Edge
The standard edges are distinguished by the profile with strong lines and marked traits: robust and essential, they guarantee the resistance and durability during time.

Slim Edge
The slim edges are a distinctive characteristics of Franke sinks: they increase their elegance and facilitate their installation in the most refined settings.

Prefixed sealing
A solution applicable to different models that allows installation of the sink without putty, ensuring an esthetic outcome and reducing the risk of water infiltration.

Exclusive design
Exclusive design, elegance and exceptional functionality are recurring characteristics in the majority of Franke sinks. The slim edges, the professional taps and fittings and the elegant shapes of the strainers make Franke sinks truly unique.
Applicable to different models, prefixed sealing makes it possible to install the sink avoiding the use of putty, so as to ensure optimal appearance and guarantee greater protection from water infiltration.

TIS System
Accessory created to guarantee the perfect stability of the higher mixer taps without generating stress on the base, the TIS (tap installation system) is combinable with all models.

Maximum capacity
Many Franke basins are developed in depth or in width in order to increase the holding capacity of the sink.
The Neptune sink, for example, has a deep storage capacity and a 360x420x200 mm basin compatible with a wide range of accessories, which increase its smart functionality.
Their sleek lines and contemporary design ensure that these sinks are among the most highly appreciated and facilitate their installation in the most modern surroundings.

Chopping board

Premium Basket

The basket wider grip facilitates the extraction from its seat.

Hidden Overflow

The hidden overflow replaces the traditional slots, giving greater aesthetic cleanliness to the bowl.

Slim Edge

Franke's distinctive feature, facilitates installation.
Even in the most sophisticated contexts.

15 Radius

15 mm bowl radius for balanced shapes and greater comfort, even during cleaning operations.

Prefixed sealing

Functional solution to install the sink without silicon or glue.
Reduced risk of water infiltration.

Neptune Plus series is equipped with hidden overflow and Premium basket.

Fragranite Sinks

071 – 072 General Characteristics
073 – 074 Fresno / Kubus 2
075 – 076 Maris
077 – 078 Boston
079 – 080 Kubus Undermount

Cleaning

As a non-absorbent surface, Fragranite is also resistant to stains and does not risk altering even when in contact with oils, greases etc. etc ...

Heat Resistant

Fragranite resists high temperatures, keeping its appearance unchanged over time.

Hygiene

Thanks to the exclusive sanitized sanitizing treatment, the sink is protected 24 hours a day and made even more hygienic: the bacterial and microbial proliferation is reduced to 99%.

Scratchproof

No scratches: Fragranite sinks are not even scared of scratching, as always as new.

Mixers

Mixers

Franke Mixers are the most professional business partner of your home with its wide range of products with different designs that appeals to every modern and classic kitchen.

Design compatibility

You can easily find the perfect match for each selected sink. Because each detail counts.

Semi-professional mixers

Franke Semi-pro Mixers are as functional as the pull-out mixers, it offers greater ease of installation by combining efficiency and ease of use.

Surface and color alternatives

Franke Mixers range has a wide number of surfaces and colors. Alternatives in chrome, steel, bronze and granite, harmonious colors make it easy to choose the perfect balance with the kitchen system.

28 mm new cartridge

Saving on water:
The dual-stage system reduces water consumption by allowing passage from a moderate opening flow to full flow.

Child safety:
The temperature adjustment system allows protection against possible heating.
