Made in Italy | Since 1960

## CLOSE TO YOU.

Close to you.

The history of **KARIBA®** begins in 1960, when we gave life to the production of exposed and concealed flushing cisterns for WC, plates and accessories with a brand recognizable in Italy and all over the world.

Thanks to the factory located in Lerici (SP) Kariba guarantees a “made in Italy” production and, thanks to the high quality of our cisterns, we are considered as one of the most successful players in the market. The reliability, quality of our products, the know-how of our technical staff, the compromise between tradition and innovation have made Kariba as one of the leading manufacturers of flushing cisterns for WC in Italy. For over fifty years we have been chosen to enter in houses, work and entertainment places around the world: being close is our constant thought.

## SMALL SIZE. GREAT EFFECT.

Small size. Great effect.

The design solutions dedicated to bathrooms, both in public and private spaces, in the past few years have reached high levels of esthetics and design, with solutions as unique as each one of us.

Our new control plates, **AUREA** and **FIDIA**, match perfectly with the last generation of bathrooms thanks to the elegance and personality of their shapes, and are designed to fit all the Kariba flushing cisterns (6 and 9 liters).

Thanks to their small size, the minimal design, the possibility of customization, the new control plates **AUREA** and **FIDIA** represent the ideal solution for those who want to turn a bathroom in their bathroom.

# Kariba 6 E

save water, protect the world.

**MAKE YOUR LIFE EASIER!**

Make your life easier!

**KARIBA®** loves the world we live in, so we decided to design the **KARIBA 6 E** concealed cistern, which saves from 3 to 4.5 liters of water at each flush.

Thanks to its tank shape it ensures a perfect cleaning of the WC with only 6 liters of water, decreasing considerably the total water consumption generally amounting to 9 liters.

In a world where the environment sustainability is a key value, **KARIBA 6 E** is the right product for those who want to build a better future.

**KARIBA 6 E** is available with a total flush adjustable between 6 and 4,5 liters (with a partial flush of 3 liters), with a support structure for wall-mounted WCs.

### OUR CONCEALED CISTERNS' FEATURES

- In-wall cisterns are made of HDPE without points of junction
- Connecting sleeves, outlet bend and D. 90/110 adapter included inside the support structures for wall-mounted WCs
- WC coupling included in the support structurese for wall-mounted WCs.
- Silicone gasket
- Maximum capacity ca. 4,5/6 or 6/9 liters
- Anti-condensation lining and plaster fixing net
- 1/2 " water input connection
- Monolith, Fix Pratika and Teknopratika are available for pneumatic system suitable for the disabled
- Ca. 3 liters partial flush (adjustable)
